Professor J.Lederberg
University of Wisconsin
Madison, 6. Wisconsin.

Dear Prof.Lederberg,

I hope you both had a pleasant journey from here to Wisconsin. Today I received my I.20 form and the admission letter from the Dean, Medical school, Stanford University. I must thank you for the same.

I am enclosing herewith a booklet on the Carl Zeiss Fluorescence microscope. This, with Phase contrast attachment and mercury arc lamp with cordoid condenser will be ideal for our use. This equipment has also a fine photo-micrographic attachment.

Our new colleague here, Dr.Howard Holtzer from Pennysylvania has bought very recently a similar one after examining several other makes that are available in the market now. These microscopes are 40% cheaper here, than in USA.

With this microscope, I hope to stain some bacteria with Ac.orange according to the methods of Drs.Armstrong and Anderson.I hope to meet these two persons on my way to NewYork. I shall reach Palo Alto during the 1st week of February.

Kindly write to me about the microscope.I am also bringing with me some samples of acridine orange stains that are available here and in England.

With best wishes to you both for a happy new year,

Yours Sincerely

Gau
